Power BI Assignment 2 – DAX & Data Visualization

Assignment Task Overview

Calculated Columns

Create a Calculated Column for 'Category Type': Add a calculated column in the Order Details table that combines the 'Category' and 'Sub-Category' columns into a single 'Category Type' column.

Calculate Revenue per Order in Order Details Table: Create a calculated column in the Order Details table to compute the revenue (Amount * Quantity) per order.

Create a Calculated Column to Categorize Sales: Add a calculated column named ‘Sales Category’ in the Order Details table that categorizes each order as 'Above Average' or 'Below Average' based on the Amount value.

Calculated Measures

Order Count- Create a measure that calculates the **total number of orders** in the **Order Details** table.

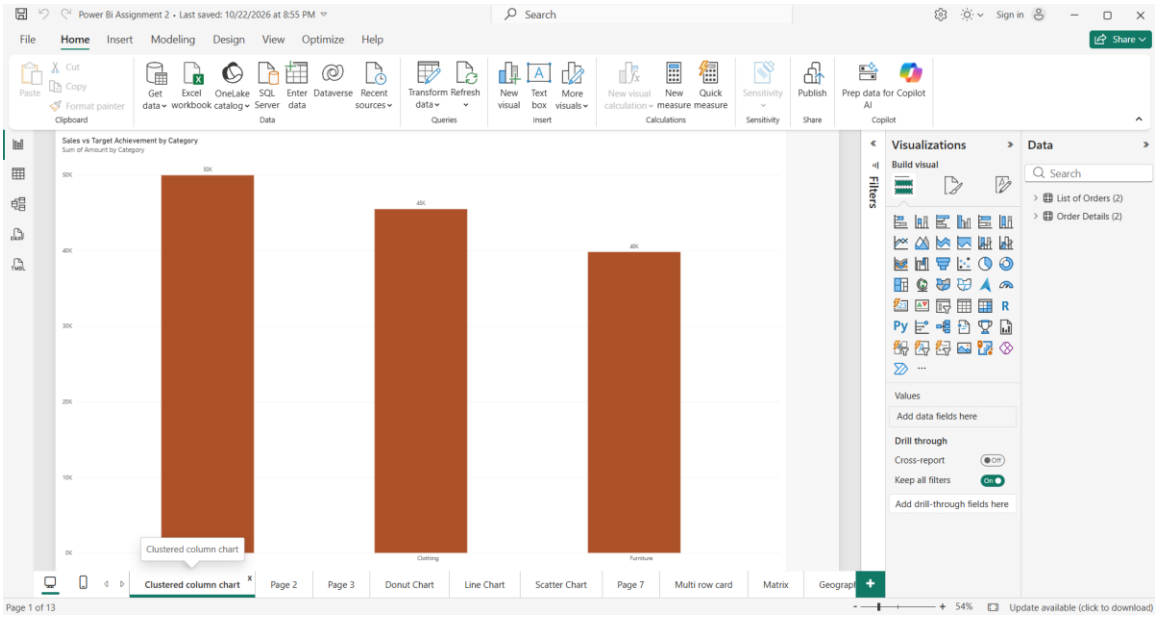

Average Profit in Delhi- Create a measure that calculates the **average profit for orders placed in Delhi**.

Year-to-Date (YTD) Sales- Create a measure that calculates **total sales accumulated from the beginning of the year up to the current order date**.

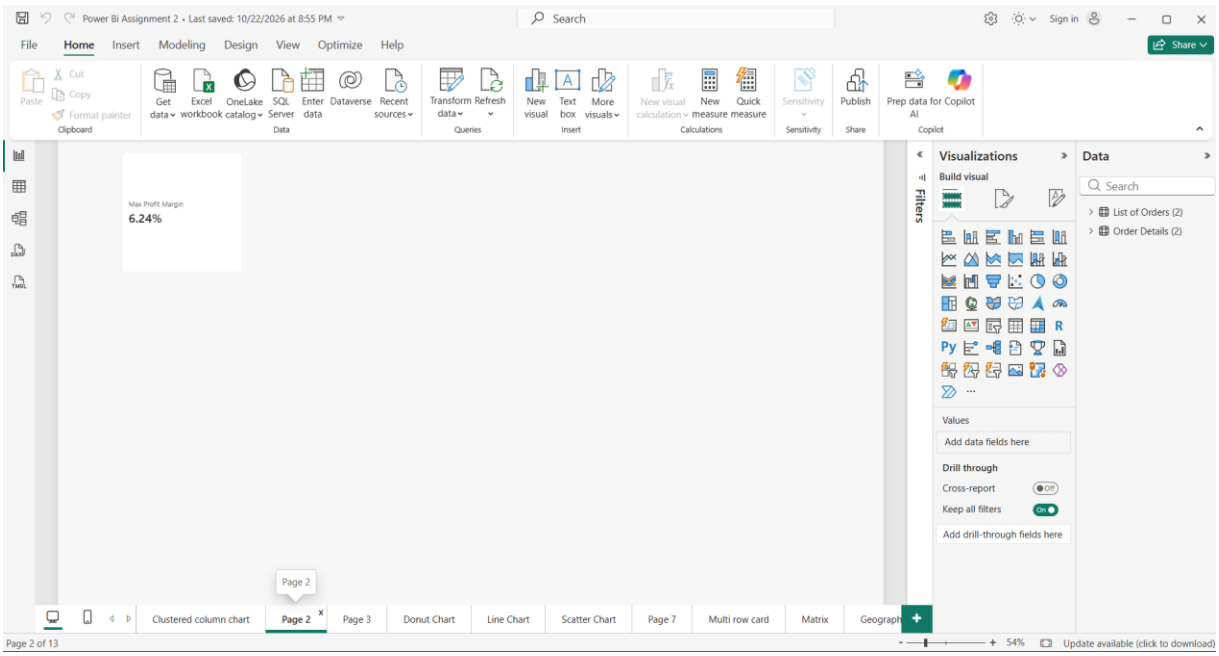

Data Visualization

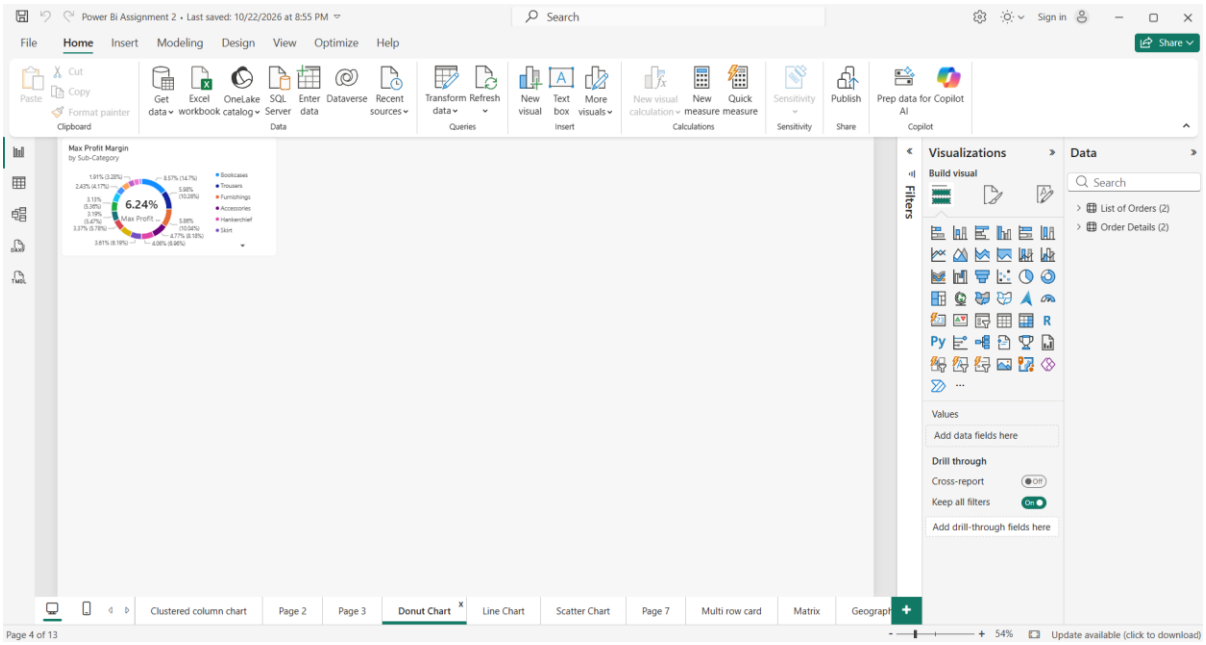

Create the following visualizations using Power BI:

Sales Target Achievement by Category: Compare actual sales with sales targets by category using a clustered column chart.

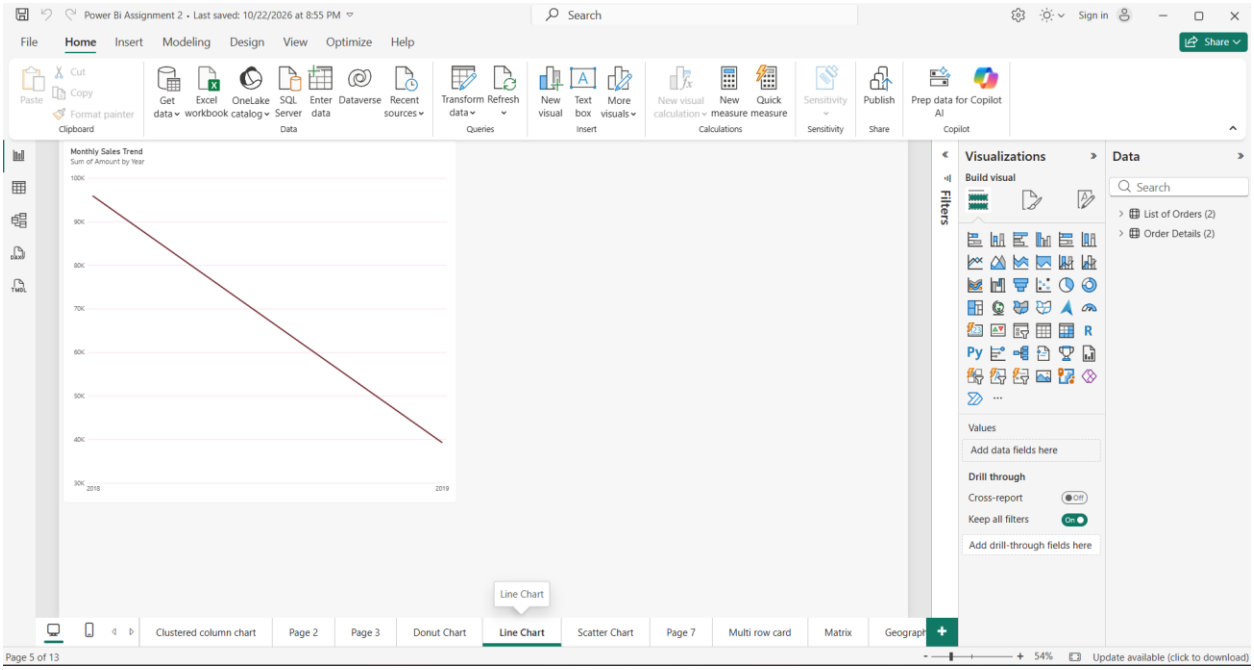

Max Profit Margin by Sub-Category: Analyze the maximum profit margin for each sub-category of products using a donut chart.

Monthly Sales Trend: Show the trend of monthly sales over time using a line chart.

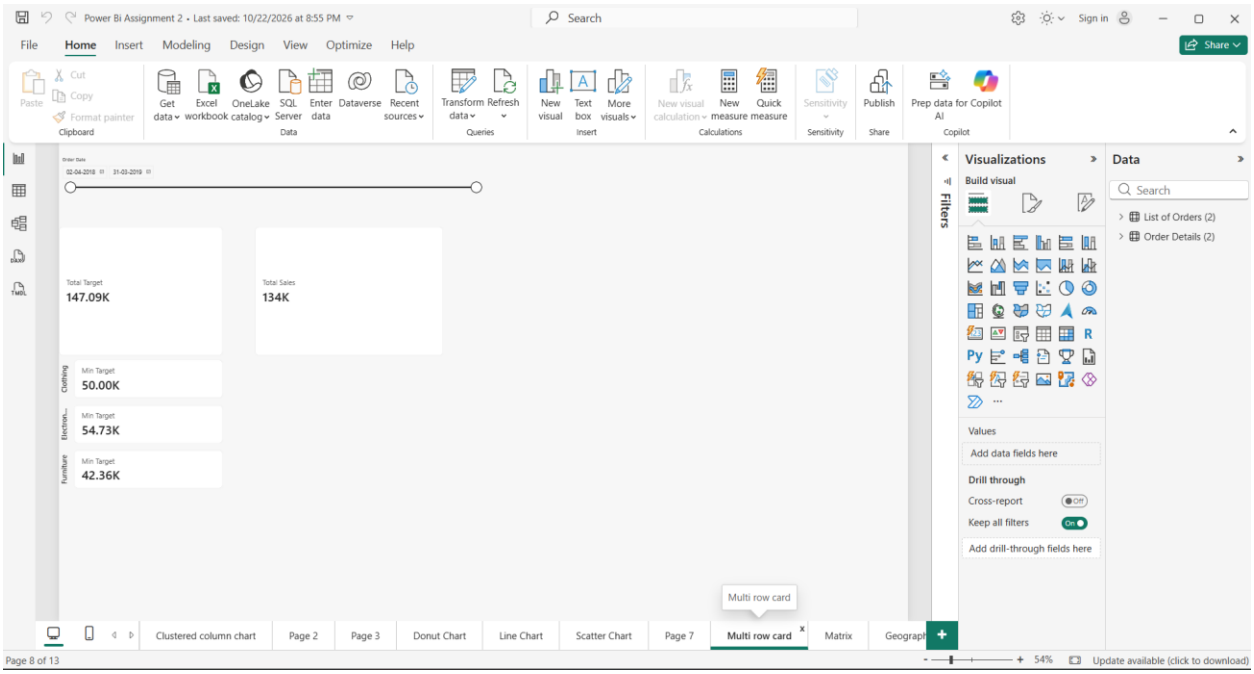

Comparison of Profit and Quantity by Sub-Category: Compare the relationship between profit and quantity sold for different sub-categories using a scatter chart.

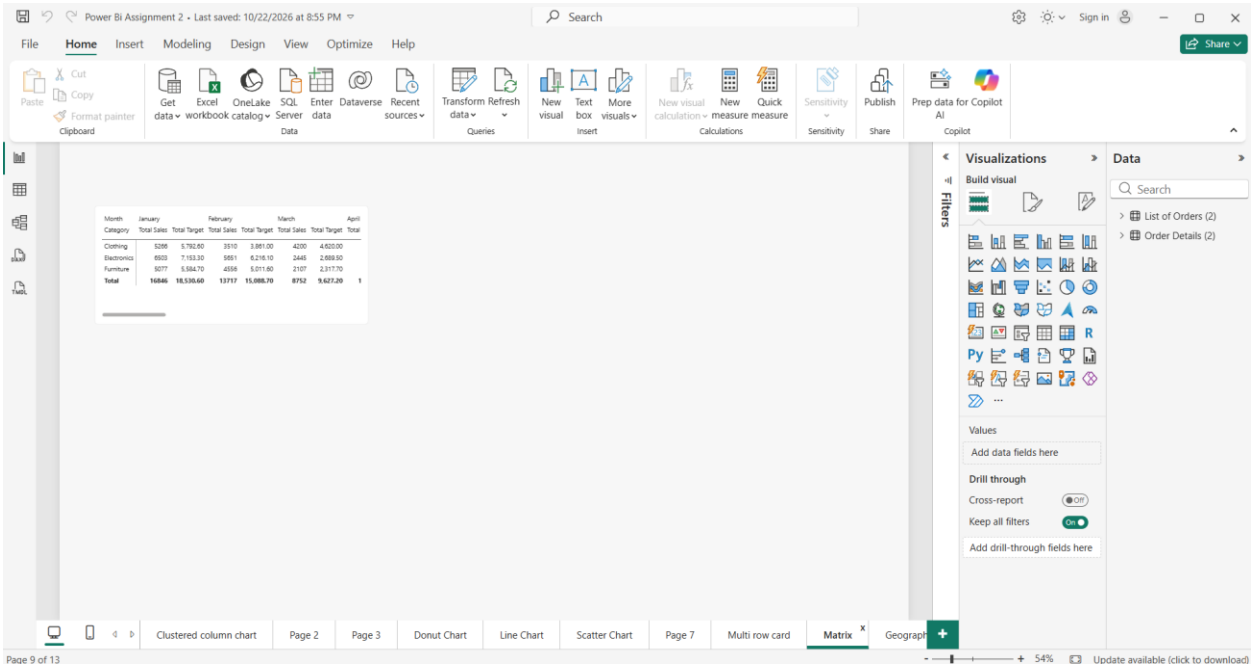

Comparison of Total Sales Amount and Target: Create cards to succinctly display the total sales amount alongside the sales target for quick comparison and analysis. Also, create a multi-row card to display the minimum target for each segment.

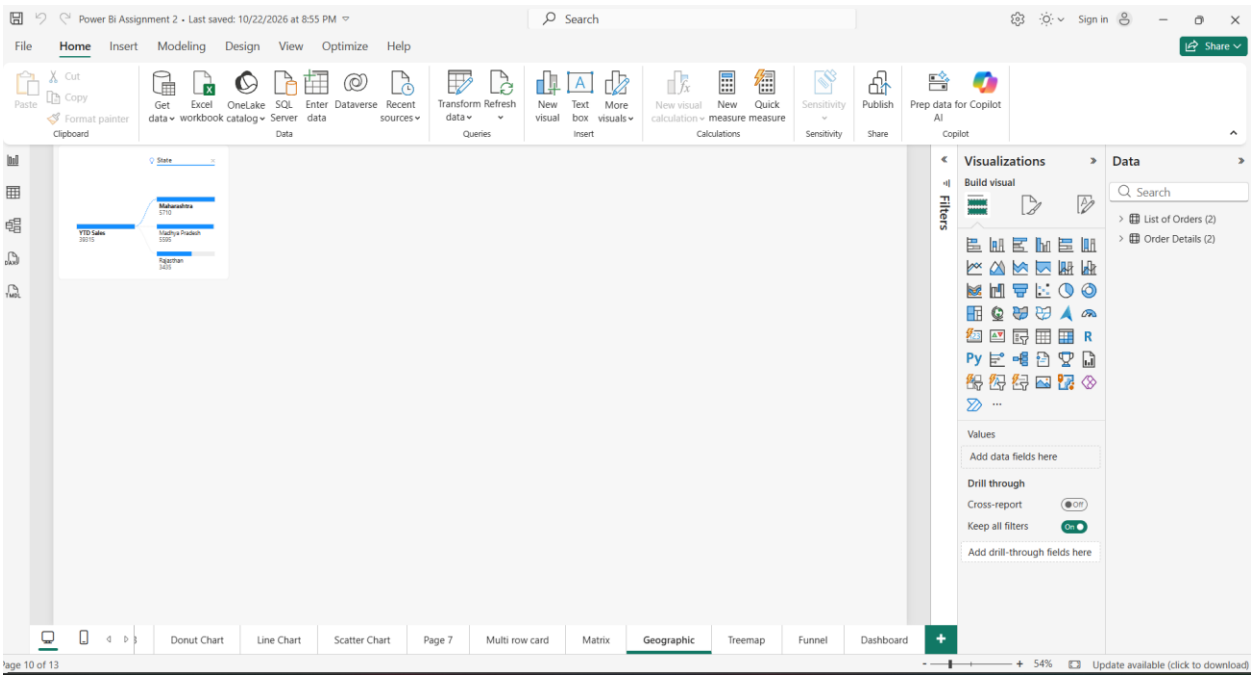

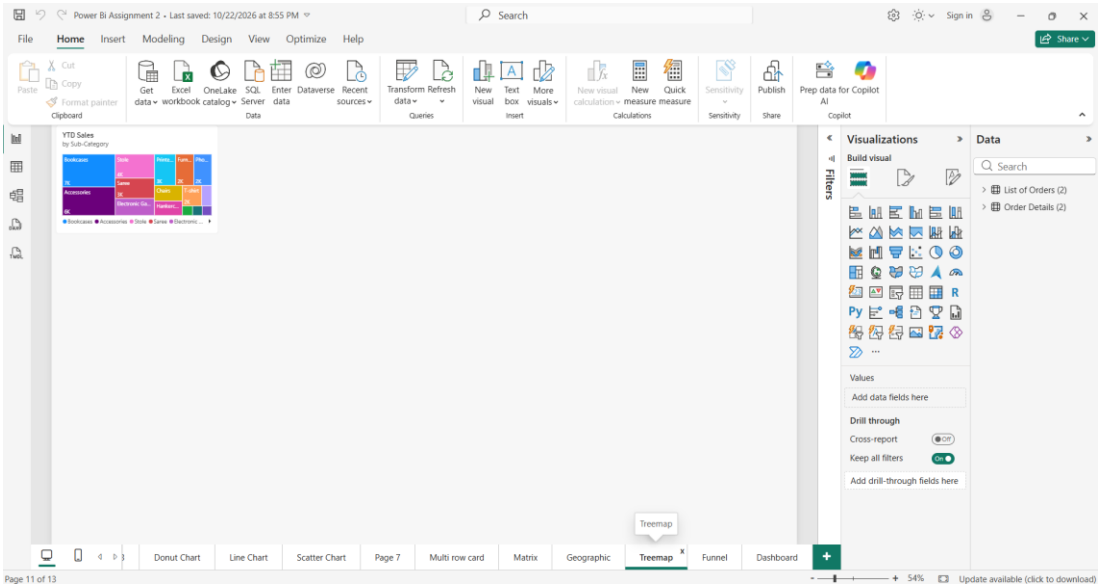

Sales Performance Matrix: Build a matrix view to analyze how actual sales compare to sales targets across different categories and months.

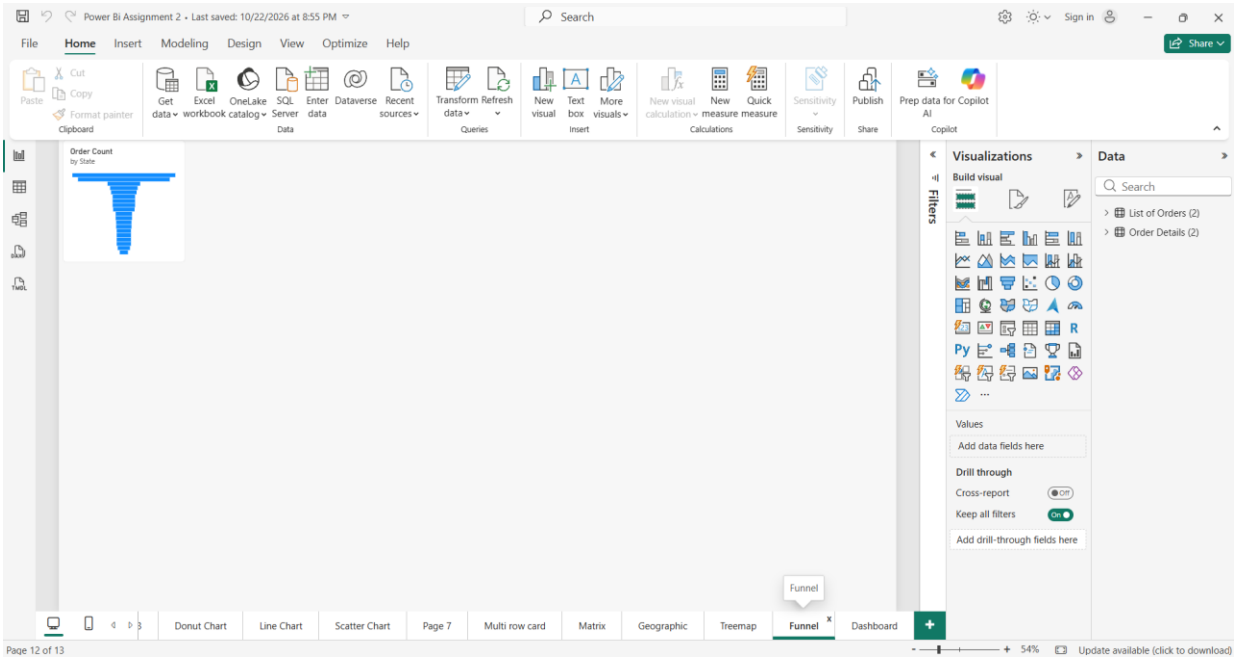

Geographic Sales Analysis: Visualize total sales on a map by city to identify regional sales patterns.

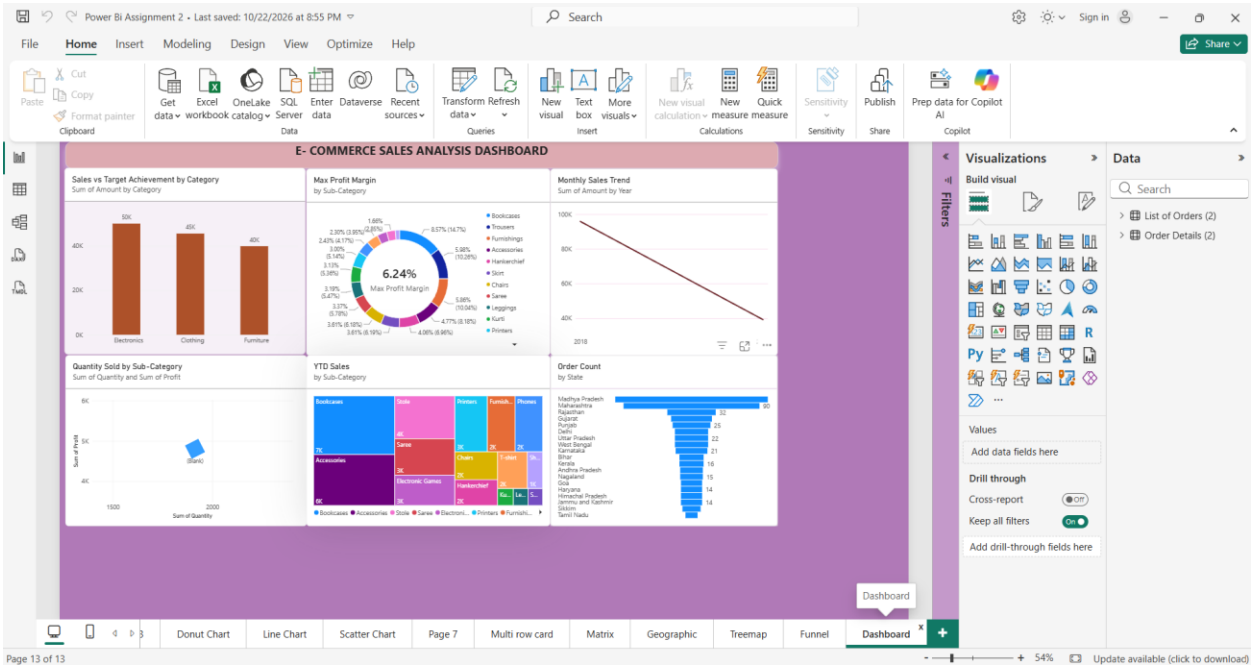

Sales Distribution by Sub-Category: Represent the sales distribution across different sub-categories using a treemap.

Order Count Analysis by State: Create a funnel chart to visualize the distribution of order counts across different states.
